

Streets Reconsidered | Inclusive Design for the Public Realm

Rethink Your Streets!

re:Streets Workshop

Banquet Hall, Community and Senior Center
1140 Oakcrest Park Drive, Encinitas, CA 92024
June 7, 2011 10 am - 3 pm

Re:Streets is a multi-disciplinary project focused on the planning, design and construction of streets to improve the livability of our cities. The project is exploring the future of streets and what America's roadways would be like if they were designed for *living*, instead of driving.

The one-day Encinitas re:Streets workshop will provide an overview of street design strategies for expanding the public uses of streets and designing streets to support human development. The workshop will provide your planners, engineers and public works staff with ideas and information for creating a network of street types unique to your city, based on the specific needs of local residents and the social, cultural and environmental character of your community. The workshop will provide attendees with strategies for prioritizing street modifications.

This workshop is being convened under the auspices of the re:Streets grant program funded in part by the National Endowment for the Arts. The City of Encinitas has offered to host the workshop on behalf of the North County Coastal cities. We invite you to participate by sending a delegation of your city staff who are most involved in street planning, design and engineering.

For more information and to RSVP by June 3, 2011, contact:
Diane Langager, Principal Planner, dlangag@cityofencinitas.org, 760-633-2714
